Admitseration of Oream of Tarter.

A writer in the teston Journal, mys there are but we consumers of the various condiments used in food the laye any adequate conception of the adulterance of those articles, which are made by dealers and here connected with the traffic.

The article of bi-tartrate of potasse, or cream of tar, is now extensively used in bread making, and those who use it were aware of the abominable giver they purchase and deposit in their stomachs use the name of cream of tartar, they would be flid with indignation.

In order to accurate in some degree the extent of the adulteration, I presented of six dealers in this size, six distinct specimens of the article, such as hey were retailing to consumers, and subjected them accurate chemical examination. The results of its examination showed that in one hundred parts the purest specimen, forty-three was gross foreign atter. In the worst specimen, sixty-wo parts in the hundred was foreign matter.

atter. In the worst specimen, sixty-two parts in e hundred was foreign matter. The addded ingredients consisted of fine white nd ground pumice, screend rice, and flour. Now not a vile compound is this to offer to the delicate ild and feeble invalid: How sbhorrent the idea at thousands are using such a mixture daily in sir food! I have no doubt but what a similar in tigation in the various towns and cities of New gland would develope similar results. For every and of pure cream of outer that leaves Boston for country, there are more than one hundred of the sely adulterated to accompany it. Of this there he as doubt. The recent rise in the price of the ole has probably led to this extensive adultera-

he fraud is very easily detected. If the pur-ser will provide himself with a small phial of the tion of iodine, and place a drop in connection the suspected article, the presence of flour or article containing starch, is instantly shown by due tint which follows. Let him place a few as in boiling water, and if it is not entirely solu-it him reject it. An experienced dealer can al-judge with a great degree of accuracy by the arance of the article. Pure cream of tartar is selly white, and has a degree of moisture and ion about it entirely unlike flour, or any of the us used to adulterate it.

eric dead to adulterate it.

RRID MURDER IN NEW ORLEANS.—About one k this morning a man, named A. M. Ballou, ceps a grocery on the corner of Poydras and ter streets, came to the First district police and reported that he suspected some foul play at son St. Peter street—that he believed a woman sen murdered there. The Chief of Police impley proceeded, in company with Lieutenant and some other onkers, to the house named, its in St. Peter street, a few doors from Poyceet, and in a room in the second story they the dead body of a woman called Eliza Phillas Eliza Love, who had evidently been brutallered. When the door was first opened the swas so great that the officers were obliged to Mand on re-entering they perceived the body ly bed, with nothing but a chemise on, and a hachief tied round ne head. On her forchead, eag round to the left temple, was a deep and glwound, from which the clotted blood and brare protruding, and from the condition in whe body was found, it was apparent that the manust have been committed some days previot is supposed, from circumstances which have transpired, that she was killed on Tuesdan.

Tjoining room on the same story was occu-

have transpired, that she was killed on Tuesday.

Tjoining room on the same story was occupied family, from whom the following details werthered:—Ballon had been living with the girl me time, and on Paesday morning a femaltiresser called at the house and knocked for sime at Eliza's door, but not receiving any answnt away. A few minutes afterwards the femalghbor met Ballon coming out of Eliza's room looked the door after him, and informed him the hairdresser had been there. He told her tif the woman came again, that Eliza had gone is the river and would not come back. He

her tif the woman came again, that Eliza had gone is the river and would not come back. He then but returned as hoar or two afterwards with apply trunk. Nothing more was heard of Eliza liase night, when Ballou gave information at the e office, as before mentioned.

On hig these suspicious circumstances, Ballou was injustely arrested and handenfied, and the Corones for. On his arrival a jury was empannelled,, after a patient investigation, returned a verdict; the deceased "came to her death from blows ited with a heavy binninistrument, crushing her I, in the hands of A. M. Ballou."

From mether of the murdered girl we learn that theter's true name was Berthene Sweten, and that was about seventeen years old. The mother I in Algiers, and on Tuesday Ballou and her daug alined with her. On that occasion the latter toly in other that Ballou treated her with the utmoundness, and had promised to marry her in a few 4. They lett her late on Tuesday afternoon, and never saw her child alive again.

From we can learn there is but little doubt that jealo was the came of this dreadful murder. A young I who lived a few squares off is said to have been familiar with the unfortuneter rif, and

that jeale was the cause of this dreadful murder. A young I who lived a few squares off is said to have been familiar with the unfortunate girl, and it is supportia; Ballou saw or heard of their intimacy, and his rage murdered the girl who had deceived him?rom the position in which the body lay, and from the position in which the body lay, and from the position in which the body lay, and from the position in which the body lay, and from the position in which the body lay, and from the position in which who had deceived him?rom the position in which who had developed a supposed that she was struck while asiceput almost most only killed.

Ballou wipresent during the inquest, and appeared perily unmoved, merely reterating from time to time the didn't do it.

We saw a guerrecty, e of the deceased, taken a short time se, and she was extremely handsome.

The Great Editor Niagara F. Ils, seems, from the following, to ha got enough of their entertainers' hospitality by t time he arrived at Cleveland:—I might make ta letter, written before breakful. lowing, to ha got enough of their entertainers' hospitality by t time he arrived at Cleveland:—I might make the letter, written before breakfast, and in a hurry, theredium of a vast amount of personal intelligence, brunning over the nomenclature of editors; but the is little use in that. Nearly every paper is hereby its editor or sub. You ought to have seen the at last night about midnight, when they got throut coaling, with the humanity strewn about it. Cart sacks were convenient as pillows; and if one hi got state rooms, they fared better than I could besibly have fared, judging by the lack I had fring the day. I was the very hindmost in the undmost car, had to stand up most of the way, and sing last served, did not come in for my share of the line and other tickets so "munificently provid, &c." The checktaker here insisted on takig my checks, and having my trunks aboard the boar He put two of them on the wrong boat, and afte I had got off again, I found the biggest here amig some old lumber on the depot corner.

American Sig.—At Newport, Kentucky, opposite Cincinnati, here is an unpretending silk factory. It employs sometalt dozen or more laborers, with five looms, and sme one hundred and fifty spindles, consuming annully several hundred weight of raw silk. These arepocket handkerchiefs, cravats, vestings, and plain nd plaid silks. As far as possible, raw silk of Amelcan growth is used in the factory, but the importecarticle has to be relied on to make out a supply. The raw silk raised in Ohio, Indiana, and Kentucky, when tolerable care is used, is not surpassed by my in the world, being equal to the best Italian, (when is all consumed in Europe.) and better than any imported in this country. This is ewing to the my imported in this country. This is ewing to the my imported in this country. This is ewing to the my imported in this country. This is ewing to the my imported in this country. This is ewing to the my imported in this country. This is ewing to the my imported in this country. This is ewing to the my imported in this country. This is ewing to the my imported in this country. which impart pouliar justre and strength of fibre and cannot fall, a time, to make the United States one of the greatest silk growing countries in the

## PINANCIAL AND COMMERCIAL.

## MOINT MARKET

SUNDAY, July 31-6 P. M. The stock market during the past week has been con siderably excited, and at the close yesterday, a different state of things existed than at the close of the week previous. There has been quite a revolution among the far Some of the erange five or ten percent lower than prices carrent ten days since, and helders have been serious sufferers. The coal stocks have borne the bruni of the panic, but we doubt if some of them have yet touched bottom. Parker Vein must soon experience reaction, and recover most of the depreciation. It has fallen too far, aut a class of buyers will, without doubt, soon appear, and carry up the market value considerably above its present point if not to the point it fell from. There is more real value in this coal stock than any other of the fancies on the list, and there is very little doubt but that it is a good purchase at present prices, in view of a speculative novement for an all vance. So far as the stock market generally is concerned we have little faith in better prices at present. Our Spancial affairs have suddenly assumed a dangerous position, and the complexion of matters in Europe is not calculated to improve them. We do not see how large chipments of specie can be prevented. The future does absplaces of specie can be previous. The future cos-not look so cheering and as full or hope as formerly, and it may be well enough to more along cautionaly, with a sharp eye to the main sheet, ready to let go at a mo-

ment's warning.
In the successive defaloutions which have been exhibired by several railroad companies in the non-payment of dividends, we have presented to our consideration the bold practical truth that the roads of these companies entirely overburthened by enormous debts. Budson River Ratirord Company commenced the dimculty. It was the inevitable consequence of the compet tion it has to contend with is running at uncommerative rates in opposition to the Harless Rail:out and the river steamers. It is now reduced to a certainty that this my will never be in a condition to compensate the

st whiteldars, and there are some shrowl obs strickledgers, and there are some alread observers who ent-risk doubte as to the long continuance of the payment of their interest. The next in succession is the Rrie. This company is said to have only postsoced the dividend; a species of prevariention intended to keep up the market value of the stock, which the directors well know must prove fellacious, from the fact that their floating debt is with difficulty sustained. The receipts are in constant progress of diminution, showing for the month of July a serious disappointment in the company' estimate of revenue, while the expenditure has incannot be reveaue, where the expenditure has in-creased in a still larger degree. The great object of the leading members of the board is directed to a stock re-sult; the present treasurer being at the head of this clique. In the sareer of the Hudson and the Erie we have now to announce the passing of the July dividend by the New York and New Haven Railroad Company, Is it not a fact that these three railroad companies have been deing a very large business, so large as to astonish the public, yet ret-ithatanding this most exaggerated appearance of prosperity, the stockholders are told boldly that no surplus revenue was on hand to make good any dedictencies. If this management exhibits a fair specimen of railroad financiering, then we have every reason to anticipate that inamuch as no provi ion has been made for the discharge of their floating indebted mass, that this burther will prove too serious a load to be much longer carried. It is to be remembered that these much longer carried. It is to be remembered that these thise railroad companies have been under the exclusive management of some of our most respectable citizens, and still the fact is evident that they have all been declaring divideads out of the proceeds of an increase of

GRELONG GOLD CIRCULAR.

There has been, during the week, a great alteration in the price of gold. On Monday it opened at the old rate, 17s.; it has since declined to 75s. 3d., the buying agure at this date. The intelligence that the banks for the present had stopped purchasing, along with the lowered prices in hydrey from the same cause, has had the effect of considerably damping the ardor of purchasers, it having been perfectly evident that the hitherto high rates were merely maintaized by the operations of the banks, and that in the event of their leaving the field, the price, as a matter of necessity, must fall. At the late figure, merchants could not operate on apsculation and for semittance many would rather incur the certain loss of doe per cent than risk so much on the presumed quality of our gold. The high and unprecedented quality of our first samples of native gold sent home has brought about the extreme rates, but it must be obvious that the exception (native gold of such fineaess,) has unwisely been made the rate, and calculated on.

Some communications is the public prints from Mr. Hopkins Assayer for the Port Philip Gold Mining Company, and who is fully competent to determine on the present are sent worth attention and date are sent the cort.

Exchange on Lendon drafts against gold, one per cent freight of gold delivered in London, \$5d per or. W. PATERSON. Kardinia street, April 16, 1853. WHOLESALE MARKETS.

WHOLESALE MARKETS.

WHOLESALE MARKETS.

Mainoursky April 16, 1843.

The aspect of our market through the past week has been one of firmness in the value of general merchandise, with an undiminished consumption and demand for all articles of general utility. No quantity of goods approaching to our wants have arrived, and holders are looking for advanced prices. Stocks of many descriptions are so low, that even if arrivals come to hand it must be some time before any such accomulation arises as to cause a fall of any extent. The increased number of holders of merchandise enables them to maintain prices, whereas in former times there were fewer channels for the disposal of produce, and consequently a smaller quantity gave a better supply.

An undiminished demand continues for all sorts of building materials. Inquiries are numerous for alses, bricks, fire bricks, pails, timber, linseed oil turpenties, and paints; thus showing that capital is being invested in permanent property, and yat not half fast enough for the requirements of our increasing population. Iron morgery of a useful character, purakes of the advance. Sheet tron &c., has become more valuable of late. More singuiry has been mare for apades and bundets than for some weeks. Suitable rious boots, stationery, and earth-annesse torolose have found a remunerative market; useful merchandise. Fire flour, £35; seconds, £32; bran, &c. 61; wheat, 10s. to 10s. 6d; potatoes, £40 to £43; eate, 18s. to 20s.; undge, 12s.

Spirits have remained firm in value for all descriptions. Brandy has been taken as brought forward. Runs, more doing, and at an advance of about 6d, ner gailog. C. e. in scarce, and higher prices given. Whichey, not much doing, and at an advance of about 6d, ner gailog. C. e. in scarce, and higher prices given. Whichey, not much doing, and at an advance of about the market. Good port is readily sold in cash or buttle. Sherry is taken more included the market of the market of the market of the market of the prices being realized at alsests of in bond

Domestic Markets.

Brighton Market, July 28—At market 825 beef cattle, 20 pairs working own, 00 cows and calves, 5.500 abees, and 355 awine.
